OVER HALF CENTURY OF SERVICE WHERE NEEDED THURSDAY, JUNE 30, 1960

## The Approach Of Summer

This year the first day of Summer began on June 21st, as it often does, and Summer will end September 23rd, which is the first day of Autumn. The hottest days of the year will probably come after the weather follows the traditional pattern—the longest daylight day of the year.

This is true, usually, because the earth stores up heat in the period when the sun shines longest. By July and August the earth has stored up great quantities of heat and is likely to register temperatures which exceed those of days which were actually longer in sunlight, which occurred back in June.

Therefore, even though the longest day of the year has just passed, the hottest period of the year is yet before us.

## The Threat Of Drowning

During the summer drowning is a greater threat to children than polio, pneumonia, heart disease, tuberculosis and influenza combined. Approximately 7,000 people in the United States die each year by drowning.

Of those who die by drowning, it has been estimated by government officials that 90% per cent of them die needlessly. A great many of these are children who have not been taught to swim, or who have not been taught to respect water.

Among the boys going in the service in World War II, it was discovered that only one out of

## Compliments And Smiles

Two of the weapons used by today's smooth operators are compliments and smiles. We do not belittle the value of these two items, or wish to indicate that compliments should not be freely given, and that smiles should not be more freely used.

However, it is pretty obvious that, in the commercial field, compliments and smiles are an overworked commodity. The smooth-talking salesman, who is full of compliments, is obvious, but the smooth-talking business friend, who piles you with compliments and smiles, is not so obvious.

One can get a general idea of his real friends by

ten was a skillful swimmer. Five of the ten possessed only elementary skill and four of the ten could not swim a stroke. Among the general public the number of competent swimmers is, of course, even smaller than the ratio in the service.

Parents cannot emphasize too often to their children the need for safety while swimming. Here are some rules that may save a life: avoid deep water, never swim alone, never swim in unfamiliar water, don't be a show-off, stay on land when overwhelmed in the water, and try to keep calm when in trouble.

## Still Champion!

## AS THE SUN WENT DOWN

(Anonymous)

Peoples troubles like the germs multiply during the day, when the sun is shining, when really troubled rather than the stage of unbearable proportions as the sun sinks behind the hills. Just as the sun sets, so the troubles of the day are associated with trouble, we do not know, yet it is true. It is
